A marine food chain

QUESTIONS

An underwater scene featuring a vibrant coral reef in the lower right corner. The reef is composed of various types of coral, including large, flat, yellowish-brown plates and smaller, more intricate structures. Numerous small, colorful fish, including many orange and yellow ones, are swimming around the reef. In the upper left and middle sections, several larger, dark-colored fish are visible, swimming in the clear blue water. The overall lighting is bright, suggesting a sunny day at the surface.

1. WHAT ARE SOME IMPORTANT POINTS ABOUT THE FOOD CHAIN?
2. WHAT DID YOU LEARN ABOUT PREDATORS AND PREY?
3. WHAT COULD DISRUPT THE OCEAN FOOD CHAIN?
